2 DEFINITIONS

a) **PSA Definitions**

General: Entries must originate as photographs (image-capture of objects via light sensitivity) made by the entrant on photographic emulsion or acquired digitally. By virtue of submitting an entry, the entrant certifies the work as his/her own and permits the sponsors to reproduce all or part of the entered material free of charge for publication and / or display in media related to the exhibition. This may include low resolution posting on a website. The exhibition assumes no liability for any misuse of copyright. Images may be altered, either electronically or otherwise, by the maker and artwork or computer graphics created by the entrant may be incorporated if the photographic content predominates.

Creative: Creative is defined as "altered reality".

Nature: Nature photography is restricted to the use of the photographic process to depict observations from all branches of natural history, except anthropology and archeology, in such a fashion that a well informed person will be able to identify the subject material and to certify as to its honest presentation. The **story telling** value of a photograph **must** be weighed more than the pictorial

quality while maintaining high technical quality. Human elements shall not be present, except on the rare occasion where those human elements enhance the nature story. The presence of scientific bands, scientific tags or radio collars on wild animals is permissible. Photographs of artificially produced hybrid plants or animals, mounted specimens, or obviously set arrangements, are ineligible, as is any form of manipulation that alters the truth of the photographic statement. No techniques that add to, relocate, replace, or remove pictorial elements except by cropping are permitted. Techniques that enhance the presentation of the photograph without changing the nature story or the pictorial content are permitted. All adjustments must appear natural.

PSA Authentic Wildlife - Authentic wildlife is defined as one or more organisms living free and unrestrained in a natural or adopted habitat. Therefore, landscapes, photographs of zoo or game farm animals, or any living subject taken under controlled conditions are not eligible for Wildlife competitions. The entrant must certify that the photograph complies with both the general nature and authentic wildlife definitions by adding "W" to the title as indicated on the entry form.

Photo Travel: A Photo Travel image must express the feeling of a time and place, and portray a land, its people, or a culture in its natural state. Photo Travel images have no geographical limitations. Ultra close-ups, which lose their identity and studio-type model shots, are unacceptable. Techniques that add to, relocate, replace or remove any element of the original image, except by cropping, are not permitted. Techniques that enhance the presentation of the image without changing the photo travel content are permitted. All adjustments must appear natural.

b) **FIAP Definitions**

Monochrome: A black and white work fitting from the very dark grey (black) to the very clear grey (white) is a monochrome work with the various shades of grey. A black and white work toned entirely in a single colour will remain a monochrome work able to stand in the black and white category; such a work can be reproduced in black and white in the catalogue of a salon under FIAP Patronage.

On the other hand a black and white work modified by a partial toning or by the addition of one colour becomes a colour work (polychrome) to stand in the colour category; such a work requires colour reproduction in the catalogue of a salon under FIAP Patronage.

Nature

Nature photography depicts living, untamed animals and uncultivated plants in a natural habitat, geology and the wide diversity of natural phenomena, from insects to icebergs.

Photographs of animals which are domesticated, caged or under any form of restraint, as well as photographs of cultivated plants are ineligible. Minimal evidence of humans is acceptable for nature subjects, such as barn owls or storks adapting to an environment modified by humans, or natural forces, like hurricanes or tidal waves, reclaiming it.

The original image must have been taken by the photographer, whatever photographic medium is used. Any manipulation or modification to the original image is limited to minor retouching of blemishes and must not alter the content of the original scene.

After satisfying the above requirements, every effort should be made to use the highest level of artistic skill in all nature photographs.
